To Whom It May Concern:

I am writing to you in regards to the Engineering Internship at DigitalOcean this summer. I believe that I have the skills, drive, and determination to excel within your company.

I am currently a third-year undergraduate student at Stony Brook University, where I am pursuing a degree in Computer Science with a minor in Business Management.

These are the skills that I can offer because I am:

- | | |
|-----------------|--|
| Proactive: | As a Resident Assistant at Stony Brook, catered to students' academic, professional, and social needs. Developed community within a residence hall of 200 undergraduate students through social and educational events. |
| Leadership: | As President of the League of Legends Club, communicated with fellow peers in my own executive board students and collaborated with student leaders from other clubs to to promote and host large scale tournaments and viewing parties for students. |
| Eager to Learn: | My passion for knowledge continues to motivate me to learn more about Computer Science. This has led me to participate in various hackathons and create android and web based applications. I enjoy challenging myself and have chosen to take on class electives such as Cloud Computing and Data Science to learn more about different fields in Computer Science. |

I am more than willing to dedicate my talents and abilities to DigitalOcean to grow the company, as well as myself. I may be reached at alex.chin23@gmail.com or 201-638-8380 and I look forward from hearing from you.

Sincerely,

Alexander Chin
